Capsa Healthcare Overview

- Capsa Healthcare is headquartered in Columbus, Ohio USA, with additional sales and manufacturing facilities across Canada, in Portland, Oregon, and Waalwijk, The Netherlands
- Product installations in over 70 countries and thousands of healthcare facilities worldwide
- Our comprehensive product suite ensures medication administration accuracy and control from the pharmacy to the patient, and greatly improves the efficiency of the nursing staff

AVALO® SERIES MEDICATION CARTS

CAPSAHEALTHCARE

Avalo® Series
Medication Carts

Avalo Series medication carts excel in areas that make the difference for nurses, like easy usage and access, a wide range of drawer configurations, enormous capacity, and smooth drawer action. For the pharmacy, Avalo yields consistently high user ratings, proven lock systems, and the ability to refurbish panels for lasting value.

The Avalo Difference

- Modular design for simple component replacement and refurbishing
- Support virtually all medication delivery systems including punch cards, auto-packaging, unit dose box
- High-density panels prevent denting or corrosion
- Available in neutral or Woodblend furniture-style
- Full selection of accessories and lock systems
- Maximize work space with several computing mount options for EMR/EHR.

Avalo Medication Carts are long-lasting and a superior value.

Avalo Spoolstor L
39.6"(h)* x 24"(d) x 38"(w)
Holds up to 56 bins (14 per drawer)

* *Height is floor to work surface. Single handle included. Drawers are 4"(d) and 11"(d) Shown with optional accessories.*

Packaging organization in single, modular bins with available dividers and clear lids with labeling space

Avalo®
Security Options

Lock System Choices

AutoLock™ Automatic Relocking System

Automatically secures a motionless unlocked medication cart with a user-defined relock time delay from 1-99 minutes. The system also permits the use of up to 5,000 individual user codes.

See available upgrades below.

Keyless Access with Manual Relocking

Simply enter a 4-digit access code, push down the lock lever and the cart is ready for access. To secure the medication cart, push in the lock lever. Clear visual indication of lock status is apparent from a distance.

Key Access with Manual Relocking (standard)

Featuring the Best® Core Removable Lock System, this basic yet proven lock system provides you with the flexibility to change keys to the medication cart easily. *Standard on Avalo carts.*

AutoLock™ Upgrades

Proximity Access

An advanced proximity card reader can be selected as an additional security access requirement.

Audit Tracking

Authorized users can track cart activity, including user access and relocking for over 2,000 events.

AutoLock™ automatically secures a motionless unlocked medication cart with a user-defined relock time.

M-SERIES MEDICATION CARTS

CAPSAHEALTHCARE

M-Series
Medication Carts

Maximum capacity and organization are hallmarks of Capsa Healthcare's M-Series medication carts. Pharmacies appreciate the multiple locking options and proven security, a fast return on investment, and trouble-free usage. Nurses find M-Series to be simple to access medications and supplies, and effortless to guide and open; plus drawers are infinitely customizable. Finally, sleek styling tops off the popular M-Series.

The M-Series Difference

- Support virtually all medication delivery systems including punch cards, auto-packaging, and multi-dose cards
- Lightweight, superior durability
- 3", 6", and 10" drawers
- Full selection of accessories
- Choice of lock security systems
- Maximize work space with several computing mount options for EMR/EHR.

M-Series Medication Carts offer attractive styling and huge capacity.

NEXSYSADC™ AUTOMATED DISPENSING TECHNOLOGY

CAPSAHEALTHCARE

NexsysADC™

Practical Automated Dispensing Technology

NexsysADC™ is the simplest, most secure technology to fully manage the onsite storage and distribution of medications (especially controls), STAT/first doses, and supplies. With NexsysADC, the level of security you need and expect is only a fraction of the price of alternative automated dispensing cabinets. The pharmacy benefits from a faster ROI without compromising safety, security, or operational flexibility. And the facility benefits from having the new Stat or 1st dose on-hand at the exact time it's needed.

The NexsysADC Difference

- **Medication Security:** Innovative solution to manage the restocking and access of controls and high-value medications.
- **Fast ROI Without Compromise:** Your Capsa Representative will run a detailed analysis to show how NexsysADC can be deployed in more facilities for broader control and higher customer satisfaction, compared to alternative ADCs.
- **Efficient Stat Dose/E-kit Delivery:** Eliminates manual methods like the "tackle box" commonly used in extended care settings. Significantly lowers costs associated with stat deliveries, and improves audit accuracy (no more missing paperwork).
- **Configurable For Each Facility:** Available in a standard cabinet and new countertop unit. Each NexsysADC is custom-built for your specific needs and patient population.
- **Streamlined Replenishment & Inventory:** NexsysADC identifies what medications need to be restocked. The flexible replenishment process saves time, reduces inventory turns, and prevents diversion.

NexsysADC fits your formulary and budget, in main cabinet (left) and 4T countertop. Security and storage for any size care environment:

- Extended care nursing homes
- Critical access hospitals
- Surgery centers
- Group homes
- Rehab and psych environments
- Veterinary clinics
- Dental surgery
- Hospice
- Education simulation

When more capacity is needed, add one or more Auxiliary Cabinets (right) for storing hundreds to thousands of SKUs. Networks to any Main or 4T cabinet.

NexsysADC™

Guided Access With 'CAM' Technology

NexsysADC relies on guided access with multiple levels of illuminated and on-screen prompts. This ensures the caregiver IDs the exact location of the medication, and picks the right medication for the right patient. Guided access technology also ensures restocking and inventory control are accurately performed.

Three Secure Ways to Store & Track Controls and High-Value Supplies

1 Controlled Meds

Controlled and high-value medications are safely guarded in CAMs (controlled access modules). Each 3" CAM holds up to 25 smaller SKUs, and deep 6" and 10" CAM Drawers hold up to 12 large-item SKUs.

2 Routine Meds & Small Supplies

Meds and surgery supplies are efficiently managed in dividable, locked open-matrix bins, with pick-to-light guidance.

3 Bulk Supplies & Kits

Bulk supplies, kits, and larger items are stowed neatly in configurable, locked supply drawers, with pick-to-light guidance.

Adaptable and Scalable Configurations

NexsysADC provides a fully configurable platform to permit unique security and storage capacity for any space, daily volume, and budget. Consult with Capsa Healthcare on your precise needs.

NexsysADC is scalable for any care setting that handles controlled medications. The countertop-size NexsysADC 4T (right) holds up to 150 SKUs, and the main cabinet holds up to 400 SKUs.

Specifications

Main Cabinet Model:

- Cabinet size 43"(h) 24"(d) 25"(w)
- 22" touchscreen monitor
- Capacity up to 400 SKUs (highly configurable)

4T Countertop Model:

- Cabinet size 17.7"(h) 20.4"(d) 23.5"(w)
- 14" touchscreen monitor (total unit height 26")
- Capacity up to 150 SKUs (highly configurable)

Popular configurations

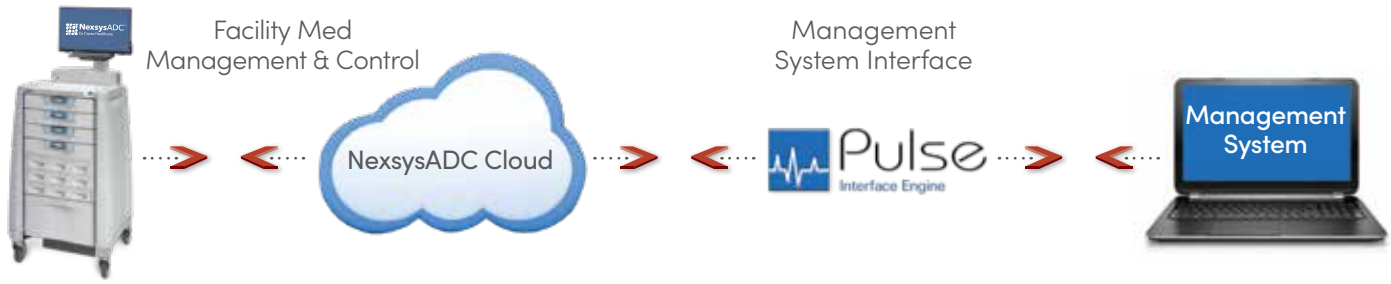
Ask your Capsa representative about our common configurations to suit most facilities' needs

NexsysADC™

Pharmacy-To-Facility Medication Management

Cloud-Based For Continuity

NexsysADC is enabled by a robust cloud solution for superior information management and maximum uptime. From anywhere, at anytime, the NexsysADC web portal provides access to all your system management functions. All essential patient medication transactions and administrative functions are captured, such as full activity and user reporting, charge capture, and restock management.



Interfaced With Your System

NexsysADC interfaces with your management system with our robust 2-way Pulse Interface Engine (HL7). Every step of the process is connected:

- **Patient Sync** for true patient validation reduces the chance of medication errors.
- **Patient Order Sync** only allows dispensed medications against approved orders.
- **Usage/Billing Syncs** sends usage electronically to the management system, eliminating manual billing and avoiding revenue loss.

Uncompromising Data Security

Our NexsysADC technology meets the highest standards for cyber security and HIPAA compliance.

Implementing NexsysADC

Capsa Healthcare makes the planning, installation and training of NexsysADC simple and straightforward. Our Support team focuses on the unique needs of clinicians.

- High-detail project management
- On-site training
- 24/7 dedicated support
- Dedicated support hotline

Telehealth Carts
and Virtual Care Solutions

Accommodates most tablets, iPads, monitors

Now, Capsa Healthcare delivers the widest range of point-of-care solutions that help your staff do what they do best: deliver exceptional care. Capsa's **NEW** Tryten virtual care and telehealth carts are simple and slim-profile. Tryten carts support virtual care, improved resident/patient experience, and remote interface with doctors, pharmacies, and family members.

Virtual Care Carts

Whether you're a few floors away or across the country, virtual care carts help you bring the specialist to the resident. Tryten solutions support a wide range of medical devices and telehealth peripherals, making it easy to evaluate, assist, and supervise effectively.

Applications

- Telehealth
- Virtual Rounding
- Patient Observation
- Virtual Nursing
- Telestroke

Patient Experience Carts

As you shift focus to delivering improved, holistic, patient-centered care, the tools and technology you require are changing. Patient experience carts have you covered.

Applications

- Video Remote Interpretation
- Bedside EHR
- Family Contact
- Entertainment
- Patient Registration

Medical Device Carts

From ultrasound to telecardiology, vital sign monitoring, and beyond, we help you store, move, and use today's smaller and more powerful medical devices.

Applications

- Vital Signs Monitoring
- Ultrasound
- Endoscope
- Cardiology

Mobility Platforms by Capsa Healthcare

KIRBY LESTER INVENTORY MANAGEMENT

CAPSAHEALTHCARE

Kirby Lester

Inventory Management

Consider how you manage your physical inventory count, especially narcotics. Hand-counting or half bottle / full bottle estimations put your inventory integrity at risk. Capsa Healthcare provides Kirby Lester pharmacy automation to yield tighter inventory control.

The Kirby Lester Difference

- Maintain absolute inventory accuracy (manual counting methods are 95% accurate at best)
- 14.3 seconds faster (average) than hand-counting for a 90-count
- Counting speed up to 15/second

Multiple Applications

- Perpetual inventory software
- Routine inventory counts of automated packaging robot cells
- Returns and expired medication inventory tracking
- Retail pharmacy operation, for daily Rx filling

KirbyLester
Automation by Capsa Healthcare

For The Narc Vault & Robot Cassettes: KL1 Inventory Counter

4.6"(h) 12.5"(d) 5.6"(w); 6.9 lb

For Retail Pharmacy Filling: KL1Plus Verify-Plus-Count Device

14.6"(h) 12.5"(d) 8"(w); 9.6 lb

Simple Inventory Counting: KL1

Count almost any tablet or capsule accurately & quickly

Eliminate inaccurate, inefficient manual counting

Rx Counting/Verification: KL1Plus

For higher-level controlled medication inventory

Keep a record of Rx fills and inventory (viewable on user portal)
