

WISHOWER THE SHOWER IN BED

HUMANIZATION OF HYGIENIC CARE

For the well-being of patient and healthcare workers

The Wishower mobile device is an efficient and ergonomic solution that provides complete hygienic care to patients in care units.

It offers healthcare facilities an alternative to traditional baths by providing an enhanced humanized experience for the patient needing special assistance while improving healthcare workers' efficiency.

1 Dignity

The patient experiences a complete shower in the intimacy and comfort of their own bed.

2 Safety

Mobile solution that minimizes the risks of accidents, injuries and infection spread.

3 Ergonomy

The Wishower requires minimum effort to operate and move around the facility.

FEATURES AND BENEFITS

New hygienic paradigm

We do not need to move the patient to the traditional hygienic equipment. **We bring the hygienic solution to the patient** thus enhancing patient safety and overall experience.

Humanization of care

The Wishower hygienic care is performed in the patient's bed to preserve comfort, and privacy. In addition to its low sound profile, risks of anxiety, fear and discomfort are reduced.

Ergonomy & efficiency

The device ensures a user-friendly, comfortable, and patient centered experience. It allows users to constantly maintain a visual on functions and indicators throughout the care.

Device easy to use

The design was focused on easy to use features for healthcare workers, such as a digital touch screen, simultaneous water spray and suction, simple decontamination instructions, etc.

Control & precision

The digital interface has intuitive indicators and key measurements (e.g. constant control on desired water temperature and water level indicator) throughout the care.

Infection prevention

By not transferring the patient to a bathing area, we minimize the risk of cross-contamination. This device has an integrated decontamination system that is self cleaning on the inside.

Designed and made in Canada

Wishower Contribution

We support Non-Profit Organizations involved in Healthcare.
